

Product Name:	G418 disulfate, EvoPure [®]
Product Number:	G030
CAS Number:	108321-42-2
Molecular Formula:	C ₂₀ H ₄₀ N ₄ O ₁₀ · xH ₂ SO ₄ (lot specific)
Molecular Weight:	496.55 g/mol (Free base)
Form:	Powder
Solubility:	Soluble
Source:	Biosynthetic: produced by <i>Micromonospora rhodorangea</i> .
Absorbance:	1mg/ml (water): 280nm <0.015 570nm <0.01 100mg/ml (water): 570nm <0.01 1.74g/25 ml (water): 280nm <0.7
pH:	4.6-6.0
Boiling Point:	1012.1 °C
Flash Point:	565.9 °C
Storage Conditions:	2-8 °C
Description:	<p>G418 disulfate, EvoPure[®] is a high purity (≥99.0%) form of G418 disulfate and is free of impurities present in standard grade G418. G418 disulfate, also known as G418 sulfate, is routinely used as a selection antibiotic in cell culture gene selection applications. G418 disulfate is an aminoglycoside antibiotic isolated from <i>Micromonospora rhodorangea</i> and is closely related to the gentamicins; most notably, gentamicin B1. G418 is a generic name of Geneticin[®]</p> <p>TOKU-E also offers G418 disulfate solution and G418 disulfate powder .</p>
Mechanism of Action:	<p>G418 disulfate, and other aminoglycosides, including kanamycin and neomycin, prevent protein synthesis by blocking the elongation step in prokaryotic and eukaryotic ribosomes.</p> <p>Mechanism of resistance:</p> <p>Resistance to G418 sulfate is conferred by the <i>neo</i> gene (neomycin resistant gene) from either Tn5 or Tn601 (903) transposons. Cells successfully transfected with resistance plasmids containing the <i>neo</i> resistance gene can express aminoglycoside 3'-phosphotransferase (APT 3' I or APT 3' II) which covalently modifies G418 to 3-phosphoric G418. 3-phosphoric G418 has negligible potency and has low-affinity for prokaryotic or eukaryotic ribosomes.</p>
Spectrum:	G418 disulfate is toxic to susceptible prokaryotic and eukaryotic cells including fungi (yeasts and molds), bacteria, mammalian and plant cells.

Microbiology Applications G418 disulfate can be used as a selection agent for G418 resistant bacteria or fungi after transformation.
