

Product Name:	Bakuchiol
Product Number:	B037
CAS Number:	10309-37-2
Molecular Formula:	$C_{18}H_{24}O$
Molecular Weight:	256.4
Appearance:	Colorless Liquid
Storage Conditions:	2-8°C
Description:	Bakuchiol is a meroterpene compound with anti-cancer and antibacterial activity.
Spectrum:	Bakuchiol has a broad spectrum of activity and is active against several Gram-positive and Gram-negative organisms. One study found bakuchiol to have bactericidal effects against many clinically significant oral pathogens.
