

<b>Product Name:</b>	Cytochalasin C
<b>Product Number:</b>	C195
<b>CAS Number:</b>	22144-76-9
<b>Molecular Formula:</b>	$C_{30}H_{37}NO_6$
<b>Molecular Weight:</b>	507.6
<b>Appearance:</b>	White powder
<b>Storage Conditions:</b>	-20°C
<b>Description:</b>	<p>Cytochalasin C is one of a family of potent mycotoxins produced by a range of fungi. All members of the class exhibit profound effects on cytoskeletal proteins, resulting in pronounced morphogenic changes in animals and plants. The cytochalasins act by disrupting actin microfilaments and these effects are most noticeable by the inhibition of cell division.</p> <p>Cytochalasin C is soluble in ethanol, methanol, DMF and DMSO.</p>
