

Product Name:	Ochratoxin B
Product Number:	O015
CAS Number:	4825-86-9
Molecular Formula:	$C_{20}H_{19}NO_6$
Molecular Weight:	369.4
Appearance:	Pale yellow solid
Storage Conditions:	-20°C
Description:	<p>Ochratoxin B is the non-chlorinated analogue of the much more extensively studied ochratoxin A. It is co-produced by the same species of <i>Aspergillus</i> and <i>Penicillium</i> that are associated with food spoilage. Ochratoxin B has received little focused investigation and its mode of action and potential hazards have been inferred from ochratoxin A.</p> <p>Ochratoxin B is soluble in ethanol, methanol, DMF or DMSO. Limited water solubility.</p>
