

Product Name: Telomycin

Product Number: T076

CAS Number: 19246-24-3

Molecular Formula: $C_{59}H_{77}N_{13}O_{16}$

Molecular Weight: 1272.3

Appearance: Light tan solid

Storage Conditions: -20°C

Description: Telomycin is a complex, high molecular weight depsipeptide discovered in 1958. The structure was not solved until 1968. Telomycin possesses potent and highly selective activity against Gram positive bacteria in vitro and in vivo when given by intramuscular administration. Telomycin is poorly absorbed after oral administration. Despite its structural novelty, telomycin has received little attention.

Telomycin soluble in ethanol, methanol, DMF and DMSO.
