Product Name: Leucomycin A1
Product Number: L031
CAS Number: 16846-34-7
Molecular Formula: C\textsubscript{40}H\textsubscript{67}NO\textsubscript{14}
Molecular Weight: 786.0
Appearance: White solid
Storage Conditions: -20°C

Description: Leucomycin A1 is a major metabolite from the leucomycin complex, a family of closely related macrocyclic lactone antibiotics produced by Streptomyces kitasatoensis, discovered in 1953. Leucomycin A1 is one of the more potent members of the complex. Leucomycin complex (kitasamycin) is used as an animal health product for control of Gram positive bacteria, Gram negative cocci, leptospira and mycoplasma. Little is known about the activity of individual analogues within the complex as their limited availability has restricted investigation.

Leucomycin A1 is soluble in ethanol, methanol, DMF or DMSO. Good water solubility.
