Leucomycin A5
PRODUCT DATA SHEET
issue date 01/06/2020

Product Name: Leucomycin A5
Product Number: L034
CAS Number: 18361-45-0
Molecular Formula: C_{39}H_{65}NO_{14}
Molecular Weight: 771.9
Appearance: White solid
Storage Conditions: -20°C

Description: Leucomycin A5 is a major metabolite of the leucomycin complex, a family of closely related macrocyclic lactone antibiotics produced by Streptomyces kitasatoensis, and discovered in 1953. Leucomycin A5 is one of the more potent antibiotics of the complex. Leucomycin complex (kitasamycin) is used as an animal health product for control of Gram positive bacteria, Gram negative cocci, leptospira and mycoplasma. Little is known about the activity of individual analogues within the complex as their limited availability has restricted investigation.

Leucomycin A5 is soluble in ethanol, methanol, DMF or DMSO. Limited water solubility.
